

# **12v lithium battery pack with large capacity**

## Overview

---

What is a 12V lithium ion battery pack?

A 12V lithium ion battery pack is a battery pack made up of three or four lithium batteries connected in series and several lithium batteries connected in parallel. This configuration allows the capacity of a 12V lithium battery to be customized.

How many cells are in a 12V battery pack?

Some packs may include additional cells for higher energy capacity or specific voltage requirements, but the standard configuration for a 12V battery is four cells. For example, a small electric vehicle or a solar power storage system commonly uses a 12V lithium battery pack with four cells.

How much power does a 12V lithium ion battery store?

A 12V lithium ion battery should ideally store between 40 and 60 percent of its power. However, maintaining this level is not always possible. For instance, a mobile phone is typically used until it requires charging. Keep in mind that 12V lithium batteries also undergo self-discharge.

How much power does a 12V battery pack provide?

For example, if a device requires 100W for one hour, a 12V battery pack needs to provide approximately 8.33Ah (since  $100\text{W}/12\text{V} = 8.33\text{Ah}$ ). This calculation informs the quantity of cells and configuration needed to deliver the required performance efficiently.

What is a 12V Lithium polymer battery?

A 12V Lithium polymer battery is a type of battery. It has large current and capacity capabilities. Lithium polymer batteries capable of high power discharge need to control the current within the product specifications. If it's not urgent, it can be charged with 0.2C, and the current generally cannot exceed 1C.

What is a charger for a 12V lithium ion battery?

A 12V lithium ion battery requires a specialized charger: the 12V lithium ion battery charger. Lithium ion batteries have specific charging needs, including a high control precision, and can be charged at constant current and constant voltage with a lithium ion battery charger.
