

# 40kw inverter installation

## Overview

---

How do I install an inverter?

Install at an appropriate height for ease of viewing LED indicators and operating switches. The inverter(s) must be installed on a structure with a load-bearing capacity of  $>4$  times the inverter weight. Install the inverter vertically or at a minimum back tilt of  $10^\circ$ . Forward installation or upside-down installation is prohibited.

Who can install the 40kW solar system?

Any licensed general, electrical, or solar contractor can install our 40kW solar kits. If you choose to hire a contractor, you should expect to pay approximately \$1.00 per watt for labor, wire, conduit, fittings, breakers, and other miscellaneous electrical components to complete the installation.

What does the 40kW kit include?

These 40kW size grid-connect solar kits include solar panels, string inverter, and the racking system for a ground mount. These are complete PV power systems that can work for a home or business, with everything you need to get the system up and running.

What is a 40kW grid-connect solar kit?

A 40kW grid-connect solar kit includes solar panels, string inverter, and the racking system for a ground mount. These complete PV power systems can work for a home or business, with everything you need to get the system up and running. The kits include hardware components only; does NOT include labor.

Can a 3 phase inverter be installed vertically?

The inverter is typically mounted vertically, and the instructions in this section are applicable for vertical installation. Some three phase inverter models can be installed horizontally (above  $10^\circ$  tilt) as well as vertically, and at any tilt

over 10° up to 90°. For information and instructions for horizontal mounting refer to.

What is a 40kW Solar Kit?

A 40kW Solar Kit is a complete PV power system that can work for a home or business. It includes hardware components only and does not include labor. This kit can require over 2,300 square feet of space and provides 40,000 watts of DC direct current power.
