

# 80W split solar all-in-one machine

## Overview

---

What is a split phase hybrid inverter r8klna?

The Megarevo R8KLNA 8.0kW Split Phase Hybrid Inverter is designed to use in both Grid-Tie and Off-Grid solar systems. With an 8kW rated output and 12.0kW maximum PV input, it perfectly supports 48V low-voltage battery storage systems. The Hybrid feature makes it suitable for Grid-Tie and Off-Grid systems without charge.

How does a solar inverter work?

With a charger controller, a display with remote monitoring, and many other built-in features. This inverter is flexible, efficient, and simple to install to a Grid-tied, Off-Grid, or battery backup solar system while being able to manage power to and from Solar, Battery, Grid, Loads, and Generator.

How many Watts Does a solar inverter need?

Because the idle consumption is high on these all-in-ones, you will need at least 400 watts of solar panels attached to your system to offset the loss. If you do not plan to have your inverter on 24/7, this is not a problem. Some models have a lower solar panel array input voltage (usually 60-148VDC).

What is a solar combiner box?

This combiner box has everything you need, circuit breakers, individual fuses for each string, and a surge protection device. Just hook your panels up to this box, and connect this box's output to your All-in-one solar input. What is a PV Combiner Box?

.

Are DIY solar panels UL certified?

Connect some batteries and solar panels, change the settings, and you are done. The DIY battery community has used these units 24/7 for years! They

are extremely dependable. As of 2021, they are now UL certified! This means that the components inside the units are high quality.

Do I need a combiner box for a solar array?

If you plan to connect a large solar array, you will probably need to put your panels in parallel to keep the voltage down. When you have more than 2 strings of panels in parallel, you need over current protection for each string. This is easily accomplished by using a combiner box. They are available below.
