

Albania dedicated solar system

Overview

Will Albania have a solar power project?

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Solar power accounts for 6% of electricity production in Albania.

How much does solar cost in Albania?

Albania ran a 300 MW solar tender last year. The Ministry of Infrastructure and Energy shortlisted nine bidders with an average price of €0.0513 (\$0.054)/kWh offered across 283.9 MW of capacity allocated in July. The country had deployed 163 MW of solar by the end of 2023, according to figures from the International Renewable Energy Agency (IRENA).

Where is Albania's second largest photovoltaic plant?

The company laid the cornerstone late last year for the 100 MW solar power system in the west of Albania. The site is near the port city of Durrës. One other PV plant is planned for expansion to 100 MW. Now another project of the same size is racing for the position of the country's second-largest photovoltaic facility.

Could a photovoltaic unit be the second-biggest in Albania?

A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Solar power accounts for 6% of electricity production in Albania. More than half of the photovoltaic output is from the Karavasta facility, the biggest of its kind in the Western Balkans. It has 140 MW in peak capacity.

What's new in Albania's 'Sunny Side energy' plan?

The positive decision for the two schemes was announced by the Council of Ministers on Thursday. The larger plan calls for the installation of a 100-MW

solar farm in the Fier region of southwestern Albania by renewable energy producer Sunny Side Energy, which was set up in 2023 by Albania-based construction-to-oil conglomerate Kastrati Group.

Why did Albania's solar plants increase in production last year?

ATA's report adds there was a fivefold increase in production from Albania's solar plants last year, mainly from the efficiency of the Karavasta photovoltaic plant, a 140 MW site developed by Voltalia. Albania ran a 300 MW solar tender last year.

Albania dedicated solar system

Solar power developers launch projects in Albania for 235 MW

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the ...

Albania awards construction permits to 108 MW of solar projects

The larger plan calls for the installation of a 100-MW solar farm in the Fier region of southwestern Albania by renewable energy producer Sunny Side Energy, which was set up in ...

EBRD and EU to fund a 50MWp solar power plant in Albania

The project aims to address the vulnerability of Albania's hydro-dominated energy system, which is frequently affected by dry weather conditions.
