

# **Angola Communications Green Base Station Construction Application**

## Overview

---

Can Angola become an alternative hub for Africa?

Angola has invested strategically to become an alternative hub for the southern and central region of Africa building datacenters, satellite construction, and optic fibers projects to connect the country internally, to the continent and the world.

How many data centers are there in Angola?

Angola has only five reliable data centers sustained by legislative framework for data security and protection. Companies must establish alternative sources of power and deal with slow internet speeds, expensive data, and scarce fiber network. Flagship Projects.

What can US companies do for Angola?

With digital transition in the government administration due to continuous threats and attacks, many projects and programs will be launched to stimulate data use, replication, and protection. A pool of opportunities exists for US companies that can assist Angola in ensuring their information and infrastructures become secure and resilient.

How can Angola capitalize on submarine cable connectivity?

It can capitalize on both the existing submarine cable connectivity, but also on planned future investments, in particular with the development of the South Atlantic Cable System (SACS), also known as the Angola-Brazil Cable deployed by Angola Cables [a company jointly owned by UNITEL and the other telecom companies of Angola].

How has digital transformation impacted Angola?

Although only 26% of the population are internet users through mostly mobile networks, Angola digital transformation witnesses rapid acceleration. The impact of the COVID-19 pandemic led companies and users to accelerate

adoption of online platforms and remain sustainable throughout the pandemic by establishing remote working systems.

How much will Angola invest in a new optical network?

We will invest more than €1.5 billion (US\$1.9 billion) to install and expand an optical network for connecting all Angola's provinces to cover all areas that are currently starved of this sort of technology, or rely on slower, more expensive, and often less reliable technologies such as satellite for these services.

## Angola Communications Green Base Station Construction Application

---

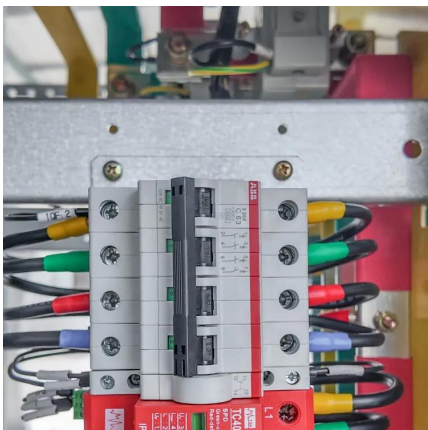

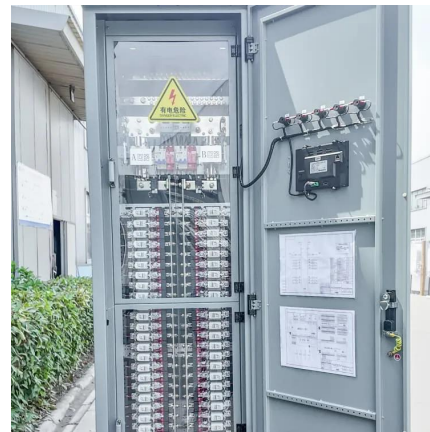

### [OneWeb launches ground station in Angola](#)

Eutelsat, through its subsidiary OneWeb, has announced the inauguration of its ultra-modern ground station in Luanda-Bengo, Angola. The result of a partnership between OneWeb Angola ...

### Eutelsat opens Angola ground station to expand satellite internet

The ground station will act as a Satellite Network Portal, linking low-Earth-orbit satellites to terrestrial telecom infrastructure in southern Africa. It is designed to deliver high ...
