

# Angola Home Solar Systems

## Overview

---

The solar project in Angola is another step towards meeting the goal of ensuring approximately 50% share of renewable energy sources by 2027. A solar home system project in Angola is set to provide electricity to at least 350,000 people, the majority of whom live in rural areas. How many solar homes are installed in Angola?

Sun Africa is installing 200+ solar cabin systems and 60,000+ solar home systems in the southern provinces of Cunene, Huila, Namibe, and Cuando Cubango. These projects will connect an additional 827,754 Angolans to electricity.

Where are solar panels installed in Angola?

We're helping Angola achieve this goal by installing a variety of solar installations throughout Angola's Southern Provinces. Sun Africa is installing 200+ solar cabin systems and 60,000+ solar home systems in the southern provinces of Cunene, Huila, Namibe, and Cuando Cubango.

What is the Angola solar project?

The Angola Solar Project creates new opportunities for Angolan communities that will no longer be forced to rely on and pay for gasoline or diesel generators. Each one of the five projects that comprises the Angola Solar Project will supply the needs of 500,000 Angolan homes, mainly in rural areas.

How much solar energy does Angola have?

**SOLAR ENERGY: 100 MW UNTIL 2025** Angola has a high solar resource potential, with an annual average global horizontal radiation between 1.350 and 2.070 kWh/m<sup>2</sup>/year. Solar energy constitutes the largest and more uniformly distributed renewable resource of the country.

How can solar energy be harnessed in Angola?

The most appropriate technology to harness the solar resource in Angola is the production of electricity through photovoltaic systems. This technology currently presents the fastest installation time (less than 1 year) and lowest maintenance costs.

What is a utility-scale solar project in Angola & Malanje?

We're developing utility-scale solar projects in two Southern provinces, Luanda and Malanje. Six municipal distribution networks will be constructed, electrifying an additional 45,000 homes. Strengthening the Angolan power sector, 600 MW of utility-scale solar PV generation will be grid connected.
