

# **Botswana Base Station Power Cabinet**

## Overview

---

Why is Botswana building a new 615 MW power station?

Botswana is contemplating building a new 615 MW coal -fired power station near its main generation plant to mitigate generation challenges at the facility. The 600 MW, coal -fired Morupule B power station has never operated at full capacity since construction in 2012 due to frequent breakdowns and is currently undergoing maintenance.

What is the power sector in Botswana?

Revised in April 2025, this map provides a detailed view of the power sector in Botswana. The locations of power generation facilities that are operating, under construction or planned are shown by type – including liquid fuels, gas and liquid fuels, coal, hybrid, hydroelectricity and solar.

How much electricity does Botswana need?

The average electricity demand for Botswana is at 850megawatts (MW), against ageneration capacity of 893MW. Demand of electricity is projected to grow to over 1200MW by2030. Additional energy is imported from South Africa. Botswana generates 48%of its power and imports 52%from the Southern African Power Pool (SAPP)7.

Why does Botswana need a secure electricity supply?

There is need to improve the security of power supply to support higher productivity.The country's national electricity access rate increased from 62.6% in 2017 to 81.5% in 2020, in line with Vision 2036 that targets universal access by 2030. The average electricity demand for Botswana is at 850megawatts (MW), against ageneration capacity of 893MW.
