

# **Brazil 48V solar power generation for home use**

## Overview

---

Are wind and solar power reshaping Brazil's energy mix?

Wind and solar power are also reshaping the country's energy mix. In 2024, they generated 24% of Brazil's electricity, more than double their share from five years earlier. Solar power grew from just over 1% of generation in 2019 to 9.6% in 2024, while wind climbed from 8.8% to 15% over the same period.

Is solar a viable source of electricity in Brazil?

Solar is now Brazil's second-largest source of electricity. Experts say its growth must also reach and respect communities cut off from the grid. Student Brenda Rodrigues da Silva works on the installation of solar panels at Fábrica Social, a professional training centre in Brasília, Brazil.

Is Brazil embracing solar energy?

Brazil isn't just embracing solar energy—it's revolutionizing its potential in the global energy sector. As we count down to the Solar World Congress 2025 in Fortaleza, let's dive into Brazil's solar energy history. Fifteen years ago, no one could have imagined that Brazil would become one of the world's largest powers in photovoltaic solar energy.

Does Brazil have a potential for photovoltaic energy?

During the era of isolated systems, some companies began to recognize Brazil's potential for photovoltaic generation. But it wasn't only the private sector that became interested in this source—the public sector also began seriously considering the possibility of expanding the electricity matrix with photovoltaic solar energy.

How much solar power does Brazil use in 2024?

For the first time, the report included electricity consumption by electrified vehicles. In 2024, Brazil recorded 215,300 licensed units and 309 GWh in associated power demand. Brazil's installed solar capacity has reached 55

GW, according to new data from the Brazilian Solar Energy Association (ABSolar).

How much solar power does Brazil have?

At the end of December, cumulative PV capacity stood at 52 GW, with roughly 3 GW added so far this year. Solar now accounts for 22.2% of Brazil's total installed electricity capacity, making it the country's second-largest power source.

## Brazil 48V solar power generation for home use
