

Can outdoor power supply be used on construction sites

Overview

Power Plus has been providing temporary power solutions for the construction industry for over 35 years. We've worked on residential housing projects, commercial & retail developments, civil engineeri.

Does a construction site need electricity?

Virtually everything we use on a job site, from compressors and battery chargers to fax machines and computers, requires electricity. Until a project has passed its final electrical inspection, all but the smallest construction sites require temporary power, whether it's provided by a portable generator or through temporary electrical service.

Do I need temporary power for my construction site?

Yet, you still haven't secured temporary power for your construction site. Most likely, you'll need temporary power poles to get enough energy for the trailers and equipment on your job site. The first step is to consult the experts. Look for temporary power companies to work with that can help you determine the power solutions you need.

When is electricity supplied to the construction site?

Electricity to the construction site is only supplied during the project. When the project is completed, the power source, such as a commercial generator, is removed. It's when the permanent power supply kicks in. It's only intended to be used to power tools, equipment and illuminate work trailers.

Do you need a source of electricity for a construction project?

Whether you're an electrical contractor, a builder, or a homeowner, there are a variety of ways to provide safe, code-compliant temporary power for your project. Synopsis: Electrically powered tools abound on the average job site. In order to use them, however, builders and tradespeople need a source of electricity.

Do I need temporary power poles for my construction site?

Your construction crew and subcontractors are scheduled to begin work in a month or two. Yet, you still haven't secured temporary power for your construction site. Most likely, you'll need temporary power poles to get enough energy for the trailers and equipment on your job site. The first step is to consult the experts.

Why do construction sites rely on temporary power?

When a piece of land is undergoing development and construction, it's not yet tapped into the grid — leaving construction teams without electricity to power their equipment. That's why they rely on temporary power for construction sites. But what is temporary power?
