

# **China Communications 5G Base Station 2MWH**

## Overview

---

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

How many people use 5G in China?

China now has over 2.34 million 5G base stations, and the number of 5G cellphone users has surpassed 575 million, according to Jin, noting that 5G technologies are widely applied in the economy, most prominently in the sectors such as mining, power supply, and the making of large jetliners.

How many base stations does China have?

China made the rollout of 5G networks a vital component of its push to boost economic growth and now boasts nearly three million base stations, according to government data. As with any wireless technology, the number of base stations determines the coverage and capacity.

How many 5G stations will China add this year?

The country plans to add around 600,000 such stations this year, and expand the coverage of 5G services in rural areas and industrial parks, Jin told journalists on the sidelines of the ongoing "two sessions."

Will 5G boost China's economic growth?

Qualcomm, a primary provider of technology for mobile networks, estimates that 5G can potentially enable over US\$13 trillion of economic output and create over 22 million jobs. China made the rollout of 5G networks a vital component of its push to boost economic growth and now boasts nearly three million base stations, according to government data.

What will China do with the 5G push?

Alongside the 5G push, China will also start trials for 10-gigabit optical networks and optimize computing power centers amid an artificial intelligence (AI) boom brought on by ChatGPT.
