

# **Cuba outdoor solar integrated machine**

## Overview

---

How many solar parks will Cuba build by 2025?

The Cuban government's plan is to install 55 solar parks similar to the one in Cotorro by 2025. The total capacity will be 1,200 MW. These are part of a broader project running until 2028, which aims to build 92 parks, with the goal of adding more than 2,000 MW to the National Electro-Energy System.

How many solar parks are there in Cuba?

On average, five parks will be synchronized every month, the minister said. This question is for testing whether or not you are a human visitor and to prevent automated spam submissions. Cuba will have 55 new photovoltaic solar parks in the course of next year, Foreign Minister Bruno Rodríguez said on Thursday.

Where are the solar panels made in Cuba?

The solar panels used in the project are partly produced by the Cuban Electronic Industry -70 percent of all the solar panels were assembled in Pinar del Río, and 100 percent were installed by the Copextel company ran by the Ministry of Computer Science and Communications (MIC).

What is the Cotorro solar project?

The project, located in Cotorro—on the outskirts of Havana—is part of the island's government's bet on solar energy to address the country's dire electricity situation. According to Ricardo Mengana, director of the Renewable Energy Sources Company, the Cotorro park began operating in test mode on the Monday prior to its inauguration.
