

Cuban Communications Construction Base Station

Overview

Is Cuba building a new spy base near Santiago de Cuba?

CSIS/Hidden Reach/Airbus DS 2024 Cuba is building a new spy base near the city of Santiago de Cuba that will be capable of tracking U.S. air and maritime military movements thousands of miles away, according to a new report from a Washington research organization.

Did China build a new 'secret signals' facility near Santiago de Cuba?

Here's what a new report found In the report "Secret Signals: Decoding China's Intelligence Activities in Cuba," published by the Center for Strategic and International Studies on July 1, the authors detected the construction of the new facility intended to collect signals intelligence near a neighborhood called El Salao, east of Santiago de Cuba.

Is military intelligence gathering radio-electronic intelligence in Cuba?

Though the exact functions of the equipment remain unclear, Cuban defectors have said that military intelligence may be gathering radio-electronic intelligence there. The satellite imagery revealed various types of antennas, including dish antennas capable of intercepting satellite communications.

Could major changes at Cuban SIGINT sites indicate an escalation?

Major changes at Cuban SIGINT sites could indicate an escalation in Cuban—or Chinese—efforts to collect intelligence on the United States. Written by Matthew P. Funaiole, Brian Hart, Aidan Powers-Riggs, and Joseph S. Bermudez Jr. Satellite imagery support by Jennifer Jun. Special thanks to Ryan C. Berg and Henry Ziemer.

How far away is CSIS based in Cuba?

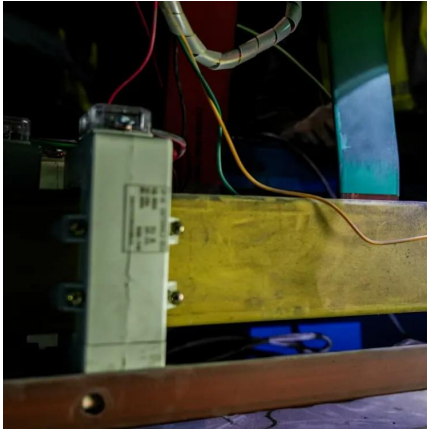

The facility is one of the four likeliest to be at the disposal of China, the think tank says. CSIS/Airbus In southeastern Cuba, El Salao features a large circularly disposed antenna array (CDAA) capable of detecting signals from

3,000 to 8,000 nautical miles away [3,452 to 9,206 miles].
