

Denmark emergency energy storage power supply price

Overview

How has the price of electricity changed in Denmark in 2022?

The war in Ukraine, sanctions against Russian oil, and rising oil and gas prices have led to the price of electricity in Denmark increasing by as much as 15% in the second and third quarters of 2022. According to the Danish power supply authority, compared to the third quarter of 2021, the increase in electricity has been nearly 83%.

Can energy storage units be installed in the Danish power system?

Elsystemansvar A/S (subsidiary of Energinet) has asked Ea Energy Analyses to analyse the benefits and main drivers for the installation of storage units in the Danish power system. This will supplement the technology aspects in the recent Technology Catalogue on Energy Storage (DEA and Energinet, 2019).

How much does electricity cost in Denmark?

According to Nord Pool power exchange data, Denmark's average wholesale electricity price in 2020 was 27.13 EUR/MWh (or approximately 32.78 USD/MWh). This was lower than the average price in many other European countries, such as Germany (41.58 EUR/MWh) and the United Kingdom (43.07 EUR/MWh).

How do I find the most affordable electricity supplier in Denmark?

To find out which electricity supplier is the most affordable, you can check the Danish Utility Regulator-operated website Elpris.dk. That will enable you to compare electricity prices across different suppliers in Denmark, which will help you find an affordable supplier. The good news is that you can change your electricity supply company.

Should Denmark invest in energy storage?

Denmark has already invested in energy storage technologies, but there is room for expansion in these areas. By investing in energy storage, Denmark

could improve the reliability of its wind energy supply and reduce the need for backup power from conventional power plants. Increased collaboration with neighboring countries.

Why is the electricity price in Denmark affected by primary energy sources?

As primary energy sources are traded across borders in Europe, and because it is possible to substitute between energy inputs in electricity production, the electricity price in Denmark is affected by the price of primary energy sources in Europe.
