

Denmark exports photovoltaic solar panels

Overview

What is the solar PV market in Denmark?

According to GlobalData, solar PV accounted for 22% of Denmark's total installed power generation capacity and 10% of total power generation in 2023. GlobalData uses proprietary data and analytics to provide a complete picture of this market in its Denmark Solar PV Analysis: Market Outlook to 2035 report. Buy the report here.

Is solar energy a viable option in Denmark?

The government supports solar PV installations through net metering schemes and tax exemptions, making solar energy a viable and attractive option. Denmark's commitment to integrated energy systems and smart grid technologies further enhances the potential of solar PV, integrating it seamlessly into the national energy mix.

How much solar power does Denmark have?

Solar power in Denmark amounts to 4,208 MW of grid-connected PV capacity at the end of March 2025, and contributes to a government target to use 100% renewable electricity by 2030 and 100% renewable energy by 2050. Solar power produced 9.3% of Danish electricity generation in 2023, the highest share in the Nordic countries.

Why is Denmark integrating solar energy into its grid?

Denmark is increasingly integrating solar energy into its grid, reflecting a strong commitment to sustainability and innovative energy solutions. The solar energy market has grown significantly in recent years, driven by technological advances and declining costs.

What is Denmark's approach to solar energy?

Denmark's approach to solar energy is strategic and forward-thinking, previously using support schemes but now operating on market conditions.

Why is solar power important in Denmark?

Solar power directly contributes to the Denmark 's energy security and independence, as well as helping to meet rising electricity demand and CO2 emission reduction goals. The rapid solar photovoltaic installations were primarily due to ongoing supportive government policies and initiatives and a sharp decline in technology and PV system costs.
