

Ecuador P26A lithium battery pack

Overview

Are Molicel p26a batteries compatible with vape devices?

These batteries are compatible to most vape devices that utilize 16850 batteries and can be recharged using a 18650 battery compatible charger. The Molicel P26A Batteries provides up to 2600mAh nominal capacity with a continuous discharge current of 25A and a max pulse of 35A. "Exactly what I ordered, got here early and they work great."

How many Mah is a Molicel p26a battery?

The Molicel P26A Batteries provides up to 2600mAh nominal capacity with a continuous discharge current of 25A and a max pulse of 35A. "Exactly what I ordered, got here early and they work great. Would highly recommend."

Can a p26a boil water?

The P26A will get almost hot enough to boil water if run continuously at 35A down to its 2.5V cutoff. In my opinion Molicel rated this cell for its intended use in power tools and other applications where the cells are used only for short periods of time at high current levels.

Are Molicel p26a cells still good?

I'm happy to report that the 2021-dated Molicel P26A's are still one of the best all-around 18650's you can buy, a great choice for almost any use from 5A-25A. The 2021 cells ran the same or a touch better than the 2018 cells I tested three years ago.
