

Estonia photovoltaic panel prices and sizes

Overview

Why should you install solar panels in Estonia?

The energy productivity of solar panels installed in Estonia is equivalent to the southern countries, as Estonia's cooler climate increases the efficiency of solar panels. We offer our customers turnkey construction of a solar park, starting from the design to the connection point, the construction of substations.

Is Estonia a good country for solar PV?

Estonia ranks 58th in the world for cumulative solar PV capacity, with 414 total MW's of solar PV installed. Each year Estonia is generating 311 Watts from solar PV per capita (Estonia ranks 13th in the world for solar PV Watts generated per capita). [source].

How much PV capacity does Estonia have?

According to Andres Meesak, CEO of Estonia's PV association, Estonia now has around 107 MW of cumulative installed PV capacity. This represents a significant increase from the 17 MW of cumulative capacity at the end of 2017.

How much solar radiation does Estonia produce a year?

In Estonia, the amount of solar radiation is comparable to Central Europe; the average amount of radiation has an optimal slope and azimuth of 1100-1200 kWh/m², 85% of which falls between April and October. An optimally installed 1 kW PV plant produces 900 to 1000 kWh of energy per year.

How much does electricity cost in Estonia?

Estonia, June 2023: The price of electricity is 0.320 U.S. Dollar per kWh for households and 0.183 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes.
