

Fast charging 380v inverter high power

Overview

What is fast charging in inverter/ups?

Fast Charging in Inverter/UPS: A Game-Changer for Power Cuts where the electricity availability is deficient. There are areas in the world like Nigeria, Yemen, Afghanistan, Syria, etc., where the power coming from the grid is unstable, and the timing for grid power availability is minimal.

What is inverted power technology?

InvertedPower technology reuses the high-powered electronics of the traction drive to perform a ultra-fast flash charge when the vehicle is connected to power. This significantly reduces the cost of charging infrastructure. The external DC fast charger is replaced by a simple AC or DC power source at a fraction of the cost.
