

# **French containerized photovoltaic energy storage project bidding**

## Overview

---

Pursuant to Article L. 352-1-1 of the Energy Code, the Decree provides for a transparent and non-discriminatory bidding process. The key elements of this process.

The increasing share of renewable energies in the energy mix of EU Member States has led the European Commission and EU Member States to reconsider their.

The regulatory framework in place provides the Minister and RTE with important latitude to determine which technologies could be eligible for tenders. However.

How much solar PV does France have?

The French government awarded 912MWp of solar PV in its most recent ground-mounted solar tender, which closed this week. The capacity in the fifth instalment of the government's PPE2 tender (Programmation Pluriannuelle de l'Energie) was spread across 92 projects, covering almost the entirety of the 925MW maximum tendered capacity.

What will France's next solar tender entail?

France is set to continue its solar momentum with the next tender round offering 925 MW, scheduled for December 2024. In addition to solar, the eighth PPE2 tender for onshore wind allocated 755 MW across 48 projects, achieving an average tariff of €87.92/MWh, consistent with the previous round.

Which EDF projects are the largest in France?

The largest projects in this round were both EDF's: the 69MWp Centrale Photovoltaïque de Variscourt in the northern region of Hauts-de-France and the 45MWp Centrale Photovoltaïque flottante du Cheylas in the south of the country. The latter is a floating solar installation at a pumped energy transfer station.
