

# Georgia Outdoor Power Inverter

## Overview

---

What is a power inverter?

The phrase “power inverter” sounds kind of sci-fi at first. Almost like something you’d hear on a television show, or in the movies—“I can’t transport the rest of the crew until I’ve had a chance to fix the power inverter, Captain”. But, in reality, it’s a tool, not unlike a power drill or a screwdriver.

Should you buy a power camping inverter?

In reviews, one of the things that keep coming up is that this power camping inverter is well built, and holds together well. When going on a wild-thing vacation, quality is important. You don’t want your power source falling apart in the desert or out in the woods.

Do you need a power inverter if you're away from home?

But when you’re away from home, a power inverter is a great choice for keeping power when you need it, where you need it. With a power inverter, you can charge your devices, use equipment—even run appliances. There are different types. Some require gasoline/propane to run. Others need deep cycle batteries. Still, others use solar energy.

Should you buy a power inverter?

Power inverters are useful tools, but like anything, not every inverter will be right for every situation. Before investing in one, consider how it will be used. A single person taking a long walk in the woods won’t have the same needs as a family of four living long terms off the grid, obviously.

How safe is a power inverter?

☐SAFE FOR USE☐Power inverter has LED indicators for under-voltage and over-voltage protection, over-temperature protection, over-load protection, and short circuit indication. Cooling fans and ground-fault circuit interrupter (GFCI) protection.

Does a power inverter have a fuel shutoff?

Plus, it has a fuel shutoff. With a fuel shutoff, this power inverter will use up whatever fuel remains in the carburetor. Then it will shut down. This helps reduce build-up in the carburetor, which can make the machine last longer. Good for camping and living off the grid.
