

# Georgia Solar Base Station EMS

## Overview

---

Do all solar facilities belong to Georgia Power?

Not all solar facilities you may come across belong to Georgia Power. We have constructed and are operating 16 solar farms and additional demo facilities across the state of Georgia, many in partnership with military installations. The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia.

How is solar energy distributed in Georgia?

The power generated is distributed by your local EMC through the power grid, along with other energy sources. Georgia's EMCs lead the nation among electric cooperatives for solar energy, with 1,276 megawatts online today and another 812 megawatts under construction.

What are Georgia's electric cooperatives' online and under-construction solar sites?

Georgia's EMCs lead the nation among electric cooperatives for solar energy, with 1,276 megawatts online today and another 812 megawatts under construction. Click the flip cards below to learn about our member EMCs' online and under-construction solar sites.

What is Georgia EMS Education dashboard?

Georgia EMS Education dashboard hosted by GDAC An overview of EMS data that provides an operating report, organization description, and basic statistical data of Emergency Medical Services (EMS) in Georgia. Critical Care Paramedic does NOT replace the Post Licensure Skills (PLS).

Does Georgia Power support Customer-Sited solar?

Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs. The 2025 IRP includes two customer expansions of BESS programs including enhancements to the

Customer Connected Solar Program and launching a new Customer-Sited Solar Plus Storage Pilot.

Why is EMS important in a solar project?

EMS plays a critical role in ensuring safety in utility-scale solar projects: Risk Management: Monitors vital metrics, such as temperature and voltage, to detect potential failures early. Automated Protections: Features like automated fault isolation and fire prevention systems protect the installation from major damage.
