

Greek solar panel outdoor power supply

Overview

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV. However, funding the FITs created an unacceptable deficit of more than €500 million in the Greek "Operator of Electricity". OverviewSolar power in Greece has been driven by a combination of government incentives and equipment cost.

Two new photovoltaic parks are currently (August 2024) under construction in Western Macedonia with a total capacity of 1,000MW. This new energy project is carried out by Greece's in.
