

Guinea New Energy Photovoltaic Site

Overview

Developed in two phases, located in Khoumagueli (40 MW) and Fello Djallou (44 MW), the project represents a \$90 million investment, underscoring the importance of renewable energy in Guinea's future. What is the first grid-connected solar PV array in Guinea?

The solar energy facility will be the first grid-connected solar photovoltaic (PV) array in Guinea. The project is being developed by InfraCo Africa with the support of Aldwych Africa Developments Ltd, in partnership with experienced French solar PV developer, Solvéo Energie S.A.S, a subsidiary of Solvéo Développement.

What is Guinea's energy plan?

Guinea's energy plan Guinea has a national electrification rate of 35.4%. Guinea's electricity supply is largely derived from hydropower, which can be susceptible to seasonal fluctuations in rainfall: 84% of businesses report power outages causing financial losses equivalent to about 4.7% of annual sales.

Does Guinea have an electrification rate?

Guinea's has a national electrification rate of 35.4%. The West African country is looking to increase its electrification rate to meet its developmental goals, as well as diversify its energy mix. Guinea's existing electricity supply is largely derived from hydro power which can be susceptible to seasonal fluctuations in rainfall.
