

House installation of solar photovoltaic panels

Overview

How do you install solar panels?

This includes installing the panels, wiring, inverter, and connecting to the existing electrical system. Installing solar panels generally involves working on the roof and around the electrical panel. Inspections: Local authorities inspect the installation to ensure it meets code.

What is the solar panel installation process?

The solar panel installation process involves site assessment, system design, permitting, installation, inspection, and grid connection. Before installation, you will want to compare different solar panel manufacturers to determine what type of panels best suit your energy needs.

How do you activate a solar system after installation?

After solar panel installation, the system needs to be activated. This involves interconnecting the solar panels, installing the inverter, and commissioning the system. During this step, note that as long as the solar panels are receiving sunlight, they have an open circuit voltage. Be careful when handling them.

Can solar panels be installed on a south-facing roof?

South-facing roofs with a 15 to 40-degree angle maximize sunlight exposure. However, a proper solar panel installation process can make solar viable even for less-than-perfect homes. A solar installer can help you determine the best solar options for your home, considering how your panels face.

How do you install a solar racking system?

Installers add landscaping pavers or concrete blocks to the bottom of the system's frame to hold the frame and top solar panels in place. You can adjust the panels on this racking system between 5 and 30 degrees, depending on the type of panel and the manufacturer. You also have the option to install a

dual-orientation (east and west) system.

Can I install a ground-mounted solar system on my roof?

If you find that your roof is not fit for a PV system, you may be able to install a ground-mounted solar system if there's enough available space on your property. Finally, your solar installation must be approved by a representative from your AHJ and electric utility before it can be activated and interconnected to the local energy grid.
