

How to install a 30kva battery cabinet

Overview

Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet. See Figure 1-2 and Figure 1-3 for line-up-and-match configuration views. Contains two or three battery strings to be used with the 93E 30 kVA UPS.

What are the requirements for a battery cabinet?

1.7 Environment The battery cabinet must be installed and operated according to the recommendations in this manual. Environmental specifications are in chapter 4.3. Ensure proper ventilation. Ensure there are no flammable gases present.

Can I use an external battery cabinet with a ups?

External battery cabinets cannot be used in combination with a UPS containing internal batteries. The UPS must be supplied without internal batteries. The EBC is designed to be installed in a line-up-and-match or standalone configurations.

How do battery cabinets work?

The battery cabinets use convection cooling to regulate internal component temperature. Air inlets are at the bottom and in Large Battery Cabinet also in the front of the cabinet and outlets are on the rear of the cabinet.

How do you connect a DC battery to a ups?

Place the DC battery cables at the bottom of the channel. 18. Route the other end of the battery cables (positive, negative, and ground) through the EBC 1 and UPS power terminal cover base wiring channels (see Figure 4-11) to the UPS cabinet external battery input and ground terminals.

How many Battery strings can a 93e 30 kVA ups have?

Contains two or three battery strings to be used with the 93E 30 kVA UPS. Up to two EBCs with a total of four or six battery strings can be paralleled together to extend the run time. To configure a 30EBC battery system with four strings, two 30EBCs, each with two strings, must be used.
