

# **India wholesale outdoor power supply market**

## Overview

---

What is the India wholesale electricity market report?

Baringa's India Wholesale Electricity Market Report provides an independent perspective on the demand and supply-side changes, drawing on information from public sources as well as Baringa in-house views. The report provides projections of black and green prices in the wholesale electricity market, and capacity and generation mixes.

What is India power market?

The India power market refers to the entire ecosystem involved in the production, transmission, distribution, and consumption of electrical power within the country. It includes power generation plants, transmission and distribution networks, electricity distribution companies, consumers, and regulatory bodies.

What is wholesale power market?

Wholesale power market in India. Wholesale markets act as a platform where electricity is traded (bought and sold) before being delivered to the end consumers (households, businesses, industries, etc.). Such trading is crucial for stability of the power system since it allows for balancing of demand and supply. Market participants include:

What are the types of wholesale contracts in India?

Types of contracts in the wholesale market in India are: Long term ( $\geq 7$  years) - A power generator may enter into MoU with a distribution company or state government to sell power for a fixed period of time as per the tariff determined by the regulator or discovered through competitive bidding.

Why does India have a different power market?

The power market in India varies across different regions due to variations in energy resources, demand patterns, infrastructure development, and policy

frameworks. Different states have diverse energy mixes, with some having a higher reliance on thermal power, while others emphasize renewable energy sources.

How is the Indian power market segmented?

The Indian power market is segmented by power generation, power transmission, and distribution (T&D). By power generation, the market is segmented into thermal, hydroelectric, renewables, and others. Only qualitative analysis is provided for power transmission and distribution (T&D).
