

# **Inverter single-phase 120v to 380v**

## Overview

---

What voltage is a 65 hp 220V single phase to 3 phase converter?

65 HP 220V single phase to 3 phase converter for sale, 50kW, with digital LCD display, input voltage 110V/220V/480V is optional, output voltage can choose 220V/380V/480V, single phase to three phase converter other voltages can be customized.

What voltages are available in a 240V 3 phase converter?

240V single phase to 415V three phase converter, 30 hp (25 kW), 1 to 3 phase converter frequency 50Hz/60Hz, input voltage 110V//120V220V/240V/480V is optional, output voltage 220V/280V/400V/440V is available, with LCD display. Other phases and voltages can be customized, directly sold by the manufacturer, cost-effective.

What is AC type single phase converter?

AC Type Single Phase Converter is the most advanced phase converter is the world, which can converter single / split phase to three phase, pure sine wave output, suitable for all types of inductive load. 100% full power output, high efficiency and low loss, with variable frequency start mode with stronger capacity to drive load Specification.

What is a 3 phase phase converter?

Three phase converter has a long service life, self-protection function. Digital LCD display phase converter single from to 3 phase static phase converter, 50 hp (40 kW), 50Hz or 60Hz frequency is available, 220V/240V/415V/440V/480V 1 phase to 380V/400V/415V/440V/480V 3 phase, low price, high quality and long service life time.

What is a phase converter?

These phase converters are mainly used to produce three phase electrical power from single phase source. By this, three phase equipment can be

operated at the site where only single phase power is accessible. These phase converters include idler generator, which is a spinning device and three legs or windings that work together to power equipment.

What is a 1 kVA single phase 110V 60hz to 220V 50Hz frequency converter?

1 kVA single phase 110V 60Hz to 220V 50Hz frequency converter, static pure sine wave output, make home appliances rated at 220V 50Hz (e.g. China) working better at 110V 60Hz (e.g. US) power supply.
