

Is it good to install solar power in Serbia

Overview

Investing in solar panels in Serbia is increasingly attractive due to rising electricity prices and falling equipment prices. Although the investment brings savings and contributes to a healthier environment, administrative obstacles and high costs still prevent wider implementation. Is solar energy a good investment in Serbia?

The independent Belgrade-based Environment Improvement Center estimates that the potential of solar energy in Serbia is 30% higher than in Central Europe. In Serbia, however, says energy efficiency expert Slobodan Jerotic, the question is really how many households can afford to invest €5,000–6,000 in solar power systems.

Who are the 'prosumers' of solar energy in Serbia?

Her four-person household is one of the first "prosumers" of solar photovoltaic (PV) energy in the country. Prosumers are households that produce and consume electricity from their own solar plants, even if these plants are made up of just a few panels. In Serbia, home-generated energy in excess of a household's needs is sent to the grid.

Will Serbia be able to supply electricity at market prices?

For the first time, consumers in Serbia are to be supplied electricity at market prices by a non-state-owned supplier.

What is a 'prosumer' of solar photovoltaic (PV) energy?

These solar panels contain solar cells that generate electric power. Her four-person household is one of the first "prosumers" of solar photovoltaic (PV) energy in the country. Prosumers are households that produce and consume electricity from their own solar plants, even if these plants are made up of just a few panels.
