

# **Is it okay to bring an outdoor power supply to Italy**

## Overview

---

If your electronic device doesn't work with 220V or 230V, you'll need to purchase a power converter (aka voltage converter) if you want to use it in Italy. The power converter does what it.

Italy runs on 220V – 230V\* and 50mHz, while the US and Canada standard is 120V and 60mHz. \*The standard is 220V, but there's a +/- 10% leeway, which is why you'll often hear 230V or.

Not only do electric outlets in Italy have a different voltage than the US and Canada, but the actual sockets (outlets) are also different. And to complicate things, we have multiple sockets (and there are usually multiple types in each household or hotel room). Italy has 3 main socket types: Type C, Type L, and Type F (aka Schuko plug). 1. Type C .

For almost all electric devices, the Type C (2-pin) adapter will work! This is the adapter I travel with in Italy, and I use it for my iPad, laptop, phone, etc. You can find it on Amazon using this link. If you're traveling with an electronic device that has 3 pins, use a Type L (3-pin) Italian adapter. It looks exactly like the Type C adapter above.

Here's a list of some electronics you may want to bring to Italy. Be sure to check the device or user's manual to find out if you can use it with just a plug adapter (it needs to be able to accept 220V or 230V input). 1. iPhone or smartphone 2. laptop 3. iPad or tablet 4. Kindle or e-reader 5. Apple watch 6. fitness tracker 7. camera battery charge.

Do I need a travel adapter in Italy?

Europeans do not need a travel adapter or transformer when traveling to Italy. Most device plugs will work with the outlet types in Italy. Some travelers may require an adapter for outlet Type L. Also, the voltage in Italy is the same as in Europe. What Outlet does Italy Use?

Type C plug sockets are used in Europe, Africa and Asia.

Do I need a power grid adapter in Italy?

Understanding the power grid in Italy can save you a lot of avoidable inconveniences and ensure that your trip goes as smoothly as possible. Essentially, you will need either a Type F or Type L adapter when in Italy, and if your plug is Type A or B (as in the U.S.), an adapter is essential.

How many plug adapters should I bring to Italy?

Purchase and bring 2-3 of these 2-prong Type C plug adapters for your trip to Italy. If you have a 3-prong device, bring a 3-prong Type L plug adapter just in case you end up in a room with a socket that has three pins. This page contains affiliate links.
