

# Lesotho Power System Solar

## Overview

---

The 70 MW solar power station project is under construction in the Maseru district. It is the first utility-scale solar project in Lesotho, divided into two phases: the first phase will deliver 30 MW and the second 40 MW, with commissioning scheduled for early 2025. How will solar power help Lesotho improve its energy structure?

The project will help Lesotho optimise its energy structure by cultivating solar power expertise to improve the economy and Basotho's livelihoods. The first phase of the project will supply the national power grid with 30MWp of electricity; while the second phase will have a capacity of 40MWp.

Does Lesotho have a solar farm?

This is especially so for countries like Lesotho that have abundant sun throughout the year. LSP Construction constructed the first ever Solar Farm in Lesotho in the Mafeteng District at Ha-Ramarethole. The project will help Lesotho optimise its energy structure by cultivating solar power expertise to improve the economy and Basotho's livelihoods.

How much does Lesotho government contribute to solar power project?

Lesotho Government Contribution to this project is estimated at M220 million which will cover the costs of land compensations valued around M57 million, Tax obligations as well as operating costs of Lesotho Electricity Generation Company (LEGCO). The government is implementing 70MW solar electricity generation project at Ramarothole in Mafeteng.

Does Lesotho have electricity?

Scatec will build, operate and majority own the facility under a 25-year Power Purchase Agreement with financial close expected early next year. Lesotho relies mostly on hydropower but is not energy secure and energy access rates are low. Only around 6% of rural households are connected to the grid.

Should Lesotho invest in solar energy?

Erection of a new 55 km 132kV overhead transmission line from Ha-Ramarothole to Ha-Mofoka. Solar energy is increasingly one of the most sought-after forms of energy in developed countries. But that already is a problem because developing countries like Lesotho, have over the years shown little appetite to invest in solar energy.

Who is constructing a solar power plant in Lesotho?

The government has also engaged China Sinoma International Engineering and TBEA Xinjiang New Energy to construct solar power plant that will produce 70 MW. Lesotho Electricity and Water Authority (LEWA) Lesotho Electricity Company (LEC) Lesotho Highlands Development Authority (LHDA)

## Lesotho Power System Solar
