

# **Lithium battery pack custom export**

## Overview

---

Can Lithium Werks make a custom battery pack?

Lithium Werks' patented Nanophosphate® battery technology (designed by MIT and A123) can be used in your custom modules. We can design and manufacture custom battery packs using lithium iron phosphate (LFP) cells for your power or energy application. Robust cylindrical, prismatic, or pouch cells can be produced for your pack.

Why do companies choose Lithium Power?

One of the major reasons why companies choose Lithium Power, Inc. as their technical partner is because we can provide them with communication protocols to control, command, and remotely monitor/manage their custom made battery packs. The ability to offer communication capabilities makes our battery packs far more intelligent and desirable.

What is a lithium ion battery?

Lithium Werks builds custom battery packs and modules using lithium iron phosphate LFP batteries. Lithium ion provides power, safety, and life to your application.

Who is Lithium Power?

Lithium Power has comprehensive experience with Lithium-based commercially available cells like NMC, NCA, LFP, and LTO. We come alongside the customer as a true partner to first help define the customer's battery power needs and then optimize the battery pack design.

Can Lithium Werks provide a battery management system (BMS)?

Lithium Werks can provide modules and packs with BMS (Battery Management Systems) to monitor, control and communicate with your devices or configure the modules to accept off-the-shelf BMS products. Lithium Werks builds custom battery packs and modules using lithium iron phosphate LFP batteries.

Where is Lithium Werks made?

Lithium Werks has two wholly owned manufacturing plants located in Changzhou and Suzhou, China, providing low-cost cell and pack production for your custom module and pack designs.
