

# **Middle East Distributed Energy Storage Vehicle Manufacturer**

## Overview

---

Do EVs need a charging infrastructure in the Middle East?

A robust charging infrastructure is essential for the widespread use of EVs. In the Middle East, governments are actively working to create a network of charging stations that will make EVs more accessible and convenient for drivers.

Why are batteries becoming a preferred energy storage solution in the Middle East?

In the Middle East and African region, the demand for batteries has increased in the Middle East as a preferred energy storage solution primarily due to technological innovation and the reduction of battery costs.

Are electric vehicles a future for the Middle East?

Governments, businesses, and consumers are all working in tandem to create a more sustainable tomorrow, powered by electric vehicles. As governments provide incentives, businesses develop new technologies, and consumers embrace change, the Middle East is moving towards a future where sustainable mobility is a reality.

How is the Middle East redefining transportation in the 21st century?

The Middle East is looking to redefine transportation in the 21st century by harmonizing luxury, technology, and environmental consciousness. Automakers are adapting to changing consumer preferences by offering more luxurious, technologically advanced, and environmentally friendly vehicles.

How are EVs promoting sustainable practices in the Middle East?

In the Middle East, governments, businesses, and communities are working together to promote sustainable practices, such as the adoption of EVs. They are offering incentives such as tax breaks, toll waivers, and preferential parking to help make EVs more affordable and convenient, eventually leading

to a wider adoption rate among the population.

Where are enericap energy storage systems made?

Enericap's energy storage systems are designed, developed and manufactured in the UAE. ROX's collaboration with Enericap will enable an advanced nonchemical supercapacitor-based energy storage to be applied to the ROX vehicle range.
