

New Zealand container energy storage project bidding

Overview

When will New Zealand's energy storage project come online?

The energy storage project is expected to come online during the July-to-September period of 2026. Saft described the Huntly Power Station as “the single largest electricity generation site in New Zealand.” New Zealand welcomed its first utility-scale battery energy storage system earlier this year.

Does Eku energy have a battery storage project in New Zealand?

Eku Energy has bought a major battery energy storage project in New Zealand’s North Island to build out its storage assets. Eku Energy has acquired a 300 MW battery energy storage project in New Zealand’s Waikato region, marking its entry into the country.

What is New Zealand's First Utility-scale battery energy storage system?

New Zealand welcomed its first utility-scale battery energy storage system earlier this year. The 35 MW/35 MWh Rotohiko battery facility commenced operation with electricity distribution company WEL Networks in April, after completing testing and commissioning.

Is New Zealand a key market for storage solutions?

Power Electronics NZ Ltd Operations Director Brent Sheridan sees New Zealand as a key market for storage solutions with future generation growth primarily being led by solar and wind technology. “Both these forms of generation work perfectly in combination with batteries to provide a continuous and stable energy supply.

Will Infratec build a new energy storage system in New Zealand?

Infratec general manager Nick Bibby said that the storage system is “the first of its scale to be built in New Zealand”. As reported by Energy-Storage.news, the two companies completed their assessment of the project in late 2021, selecting a site in Huntly, a town in the Waikato District.

What will Saft's 'turnkey' storage projects do for New Zealand?

The projects will even out electricity supply from hydro, wind, and solar power, and will address electricity price volatility. Saft, whose “turnkey” containers also feature power conversion and control systems, said the contract win will be the company’s third utility-scale storage project to add flexibility to the New Zealand grid.
