

New Zealand portable photovoltaic panel manufacturer

Overview

Designed and manufactured by the world's leading household wind turbine and solar panel manufacturer, TESUP, operating in New Zealand locally among other 31 countries. We meticulously produce over 270 components, ranging from generators to electronic cards, within our European factories. What is a portable solar panel?

Unlike stationary solar panels, the portable panel can be carried around, conveniently as required. Solar panels can be used for a large variety of different functions or activities, and are suitable for emergency/home use, and also ideal for outdoor activities, such as camping. 3.

What are portable solar panels made of?

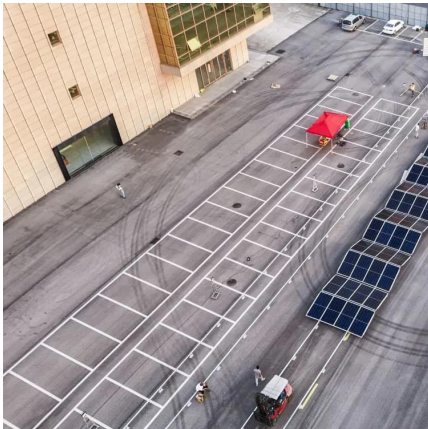

Made up of efficient monocrystalline silicon cells, it can recharge portable power stations and your electric devices, and keep your equipment running. Generate even more energy With the portable solar panel industry's first use of TOPCon solar technology, we've raised the bar on conversion efficiency, reaching 25%.

Why should you choose a portable solar panel?

1. A solar panel is small in size, allowing for easy maneuverability. They don't take up a lot of space - offering easy storage and organization. 2. Unlike stationary solar panels, the portable panel can be carried around, conveniently as required.
