

Nigeria BMS lithium battery

Overview

What is a lithium battery management system (BMS)?

Many people are familiar with a Battery Management System (BMS), which should be installed with every lithium battery. A BMS monitors the voltages of the individual lithium cells inside a battery and has the ability to shut everything down in an emergency. A BBMS, on the other hand regulates the charging of the lithium batteries.

How do I order a lithium battery in Nigeria?

Kindly fill out the short form below to order any of the lithium batteries available. Gennex Technologies Limited is a Nigeria market leader in lithium iron phosphate battery sales. We import, supply and sell LiFePO₄ Lithium Batteries with a chain of distributors network across the country.

Does a lithium battery have BMS?

First, in the case of a complete discharge, it is possible to drain a lithium battery down to a level that it cannot recover from. However, BMS circuitry now prevents that from happening by shutting down the battery before the power drain can reach a level that will damage it. Unfortunately, not all lithium powersports batteries have BMS.

Are SVC lithium batteries better than lead-acid batteries?

SVC lithium batteries (lifepo₄) have greater capacity compared to lead-acid batteries. They offer very high performance and cost less in comparison to some other batteries. SVC LiFePO₄ batteries charge way faster than a lead-acid/AGM battery. Lithium Phosphate (LiFePO₄) battery technology is the safest available.
