

Nordic Photovoltaic 20-degree energy storage cabinet price

Overview

Is the photovoltaic industry still a pipe dream?

On the European level, widespread use of PV systems with smart power storage and energy management is still a pipe dream. A small segment of the photovoltaics industry is enjoying increased demand, even if the cause is nothing to celebrate.

Is the European photovoltaics market recovering?

The European photovoltaics market has not yet lived up to expectations after the strong increase in installation figures in late 2016. Although there has been an overall revival compared to the first quarter of last year, the market has still failed to really take off.

Are photovoltaic modules going up in Europe?

In Europe, the price increase for photovoltaic modules is not quite as strong as expected, at least until now. In particular, thin film module prices remained relatively stable, with March showing barely any movement.

Are photovoltaic module prices stagnating?

While module prices for non-EU projects are in the lower 40 eurocent range, prices within the European Union are stagnating just above the 50 eurocent mark.
