

# **North Korea outdoor power supply local**

## Overview

---

**Summary:** This guide explores practical solutions for procuring durable outdoor power systems in North Korea, analyzes market trends, and identifies trusted suppliers. Discover how renewable energy partnerships and cross-border logistics can meet your power needs in challenging environments. Does North Korea have a thermal power station?

While North Korea's thermal power stations continue to play an important role in the state's energy mix, the stations were built decades ago in collaboration with engineers from the former Soviet Union and China. The outdated technology makes them inefficient, and thermal capacity has not risen significantly in decades.

How much electricity does North Korea use?

For 2020, Statistics Korea estimates North Korea's total electricity supply at 23.9 terawatt hours (TWh), while Nautilus estimates only 14 TWh. Both agree that hydro supplies the largest portion of electricity to the country and are in broad agreement on the amount.

Does North Korea export electricity to China?

Despite its domestic electricity shortage, North Korea is a net exporter of electricity to China. Electricity so far has not been sanctioned under United Nations Security Council Resolutions, and as such, has become a more important source of revenue generation for Pyongyang since foreign trade has declined over the last decade.

Does North Korea have energy security challenges?

Access to solar panels has created capacity where the state falls short, but the overall energy security challenges facing the nation are daunting. This report, "North Korea's Energy Sector," is a compilation of articles published on 38 North in 2023 that surveyed North Korea's energy production facilities and infrastructure.

Does North Korea have a power shortage?

North Korea suffers from chronic energy shortages. Rolling blackouts are common, even in the nation's capital, while some of the poorest citizens receive state-provided electricity only once a year.

Does North Korea need hydropower?

In contrast, hydropower takes advantage of North Korea's numerous mountains and rivers but also has a major weakness. The frigid temperatures every winter freeze rivers or reduce water flow, decreasing electricity production when the country needs it the most. Regardless, North Korea continues to invest in hydro projects, both large and small.
