

Norway electricity emergency energy storage price

Overview

What will Norway's electricity price entail?

3. According to the government's proposal, Norway Price will entail a fixed price for electricity of NOK 0.40 per kWh from 1 October 2025.

Does Norway offer electricity support?

The Norwegian government launched a temporary electricity support package for households from December 2021. From the 4th quarter of 2021 and onwards, data on average electricity support is included in the electricity price statistics.

What is Norway's new electricity subsidy scheme?

The proposed scheme will be a voluntary alternative to the current electricity subsidy scheme that all households and holiday homes will be offered. The proposal was sent for public consultation on 10 March 2025. On 31 March, the government also proposed introducing the Norway Price for households that use district heating.

What does Norway price mean for district heating customers?

The proposed legislation on Norway Price also means that district heating customers will have the same opportunity to choose Norway Price as electricity customers. Like the electricity subsidy scheme, Norway Price is a state subsidy scheme for households and not a fixed-price agreement in the end-user market.

Do vulnerable households pay higher electricity costs in Norway?

37 Ca. 500,000 of a total of ca. 2,5 million households in Norway. This may well mean that a share of vulnerable households ends up paying with higher electricity costs than in a scenario without Norway Price.

How does Norway price save energy?

electricity saving measures such as heat pumps, insulation, solar cells, etc, or choose alternative heating fuels such as bioenergy or wood. In other words, Norway Price secondly favours but one type of energy consumption, at the expense of other types of energy and energy saving.
