

# Oman s self-generated energy storage

#### **Overview**

What is Oman's new energy policy?

Mohsen bin Hamad Al-Hadhrami, Undersecretary of the Ministry of Energy and Minerals, described the new policy as a key milestone in developing Oman's energy sector, emphasizing its goal to innovate and sustainably leverage renewable energy while creating a comprehensive regulatory framework for self-generation and direct electricity sales.

What is Oman's self-generation policy?

This policy is part of Oman's vision to promote sustainable development, attract investment in clean energy, and support the growth of the renewable energy sector, while ensuring a balance between the interests of investors and consumers. Self-Generation Policy.

What is a generating system in Oman?

A system enabling eligible consumers to purchase electricity directly from eligible generating companies, independent of the Oman Power and Water Procurement Company, and in compliance with applicable electricity wheeling regulations. The transmission network or the distribution network, or both, as the case may require.

How can the Sultanate of Oman achieve a net-zero target?

Encourage a transition towards renewable energy to achieve the net-zero target, and attract foreign investment by providing stable and reliable clean energy. Enable and encourage investment in renewable energy projects with the goal of increasing the contribution of renewable energy to the total energy mix in the Sultanate of Oman.

What is Oman's direct sale policy?

Direct Sale Policy This aspect of the policy regulates the direct sale of electricity generated from renewable sources by qualified producers to eligible

consumers, bypassing the Oman Power and Water Procurement Company.

How much will Oman's power sector invest in the next six years?

Taken together with parallel plans for the implementation of a raft of Wind IPPs and combined cycle gas turbine (CCGT) power projects, total investment in Oman's power sector is set to balloon to well over \$5 billion over the next six years through to 2030.
