

# **Outdoor power supply can be turned on and off at any time**

## Overview

---

Should you buy an outdoor power strip?

If those two sockets in your outdoor outlet aren't enough to fulfill your outdoor power needs, then you'll want to invest in a good outdoor power strip. These handy appliances can multiply a single socket into six or even 10, allowing you to power multiple strings of lights or various outdoor appliances simultaneously.

Can a Loitinsy power strip be used outside?

There are also small mounting brackets on the four corners of the power strip's housing, which give you the option of mounting it to an exterior wall if you plan to use it outdoors over the long term. The Loitinsy power strip's outlets worked well, including all three USB outlets, after splashing the power strip with water.

Why are my outdoor lights turning off without warning?

As bulbs age, they may also develop poor connections due to corrosion or mechanical wear. This can cause fluctuations in power delivery, resulting in your outdoor lights turning on unexpectedly or shutting off without warning.

Do I need an outdoor DC UPS backup power?

Nearly any surveillance camera or communications device installation can benefit from adding an Outdoor DC UPS Backup Power. The UPS system is connected to high voltage AC shore power with three electrical butt connectors provided with each battery backup kit.

Can you keep surveillance equipment online if grid power goes out?

You can keep mission critical surveillance equipment online no matter the conditions outside. When grid power goes out, this weatherproof UPS Battery Backup Kit manufactured by Vorp Energy guarantees 24/7 power to outdoor IP cameras, gateways, AP radios, more. Plus it comes with an industry leading

5-year warranty.

How long should a power strip be?

Cord length for outdoor power strips ranges from 4 feet up to 15 feet. A power strip with long cord length can eliminate the need for outside extension cables, though they can be cumbersome if the extra length isn't required. A shorter cord is ideal if the outdoor power strip is set up close to the outdoor outlet.
