

# Portable 16 kWh power bank

## Overview

---

Can a power bank charge an iPhone 16 at 25W?

Apple's new MagSafe Charger can charge the iPhone 16 at 25W but none of the power banks reviewed here can match that. We have listed the speeds at which each portable power bank can be charged itself (Input charger) and charge the iPhone (Output charger).

How do I choose a power bank for my iPhone 16?

When picking a power bank for your iPhone, especially the iPhone 16 series, it's important to consider a few key features to ensure optimal performance and convenience. Look for a power bank that supports fast charging via USB-C Power Delivery (PD) to quickly top up your battery.

What is the best portable charger for iPhone 16?

For those who value the convenience and innovation of wireless charging, the Anker MagGo Power Bank (10K) is a perfect choice. This portable charger is officially certified by MagSafe, ensuring fast, secure, and efficient power boosts for your iPhone 16. Just snap it onto the back of your new device and watch it power up swiftly.

Which power bank should I buy?

If you are relying on the power bank for long-haul travel or a camping trip, a 10K battery or higher will suit you better. Belkin even offers a mid-range 8K power bank. If a power bank is rated as MagSafe Certified it will wirelessly charge at up to 15W.

Which power bank should I buy for my MacBook?

We recommend this power bank for MacBook users who want a portable 65W charger with MagSafe for wireless iPhone charging, plus USB options. The Raycon and Journey aren't as suitable for laptop charging, but the P3 Pro's 65W is enough to keep most MacBooks going when connected.

Does the iPhone 16 Pro Max have a power bank?

Whether you're using the iPhone 16 Pro Max for photography, the 16 Pro for multitasking, or the standard iPhone 16 for everyday tasks, a reliable power bank is essential to keep your device juiced up throughout the day.
