How much does a Volta Swiss solar installation cost?

Case study of a Volta Swiss solar installation in the Lausanne region: 37.3 m<sup>2</sup> photovoltaic installation with 10 kW intelligent hybrid inverter and 10 kWh LiFePO<sub>4</sub> storage battery for a 3-person family villa, with air/water heat pump heating system, swimming pool and charging point for hybrid car. Total cost of installation CHF 25,400.00.

Are solar panels compatible with a photovoltaic system?

Compatibility with a photovoltaic system is primarily determined by solar radiation, roof orientation, inclination, shading, and roof size. Calculate the profitability of a photovoltaic system with our Solar Calculator – Are solar panels worth it?

Solar systems combined with high self-consumption often pay for themselves after 15 to 20 years.

Is a solar roof suitable for a photovoltaic system?

Our Solar Calculator analyzes the profitability of a PV system for you. If the roof is suitable for a photovoltaic system, the question often arises: Is the investment worth it?

From a purely ecological point of view, this question can always be answered with a yes.

Which solar panels are best for RVs?

Most home solar systems use monocrystalline solar panels, but for portable applications like RVs, you may choose thin-film panels. Thin-film panels tend to cost the most in smaller sizes and the least in wide-scale industrial uses. They also perform less efficiently, but their advantage is in their lightweight design.
