## Overview

Is the solar panel on the roof?

INROOF, NOT ON THE ROOF. We identified the need for a high performance solar option that was aesthetically pleasing or visually undetectable. Then we made it happen. With our premier Nor'easter panel, the solar panel is inside the roof creating a highly efficient and 100% invisible solar thermal system.

Should rooftop solar panels be installed on new buildings?

To help accelerate that shift, the revised Energy Performance of Buildings Directive (EPBD) states that rooftop solar panels must be installed on all new buildings, public buildings and existing non-residential buildings which undergo a major renovation, all according to the time schedule shown below.

How do solar panels attach to a roof?

Solar panels are typically mounted on metal racks, which are in turn anchored to the roof surface. The installers that Kaster has spoken with are apparently insisting that fasteners attaching the rack-mounting points to the roof go all the way through the sheathing and into a rafter. But how to find them?

Mark Nagel suggests a couple of approaches.

Are solar panels and photovoltaic systems in full expansion in Spain?

Solar panels and photovoltaic systems are in full expansion in our country, especially as a result of the elimination of the sun tax. Last year, a historic record figure of 4,752 megawatts (MW) of photovoltaic solar energy was installed in Spain.

What is Rockwool roof insulation?

ROCKWOOL roof insulation is designed to withstand this additional weight with ease. Our roof products are dimensionally stable and do not change shape due to changing conditions. Made from natural stone with a proven lifetime of

+65 years, our products contribute to reducing energy consumption and CO2 emissions from buildings.

Should a roof deck be insulated?

Exterior roof deck insulation is frequently recommended at GBA when the aim is to turn an attic into a conditioned space. There are a number of performance advantages. But as rooftop solar installations become more common, does that mean others face the same dilemma as Kaster?
