

Rooftop terrace solar panels

Overview

What is a rooftop solar system?

A rooftop solar system is an array of solar panels installed on a roof, each containing several solar cells that absorb sunlight and create an electric field across each panel. Roof-mounted solar systems are more discreet than solar setups installed at ground-level because they are hidden from view, and they save space on the property.

Are solar panels a good option for a terrace?

By incorporating solar panels into your terrace design, you not only reduce your carbon footprint but also enjoy the financial savings and energy independence that come with it. So, if you are looking to transform your terrace into a sustainable oasis, MYSUN Solar pergolas are the perfect choice.
