

Simple solar drip irrigation system

Overview

Learn to install a solar-powered drip irrigation system with valves, multiple zones, various drip emitters, and more. Video included! .

Automated drip systems are one the best parts of any garden project, in my humble opinion. Installing drip irrigation isn't all that difficult, and the payback is well worth the effort! Drip systems.

Most large drip irrigation systems must be divvied up into several distinct zones (stations) that will run at different times. This offers a number of benefits, and is easy to achieve with a simple.

Below is a list of all the supplies we used to set up our solar powered drip irrigation system. For anything that involves a PVC/threaded connection, note that I linked parts compatible with $\frac{3}{4}$ inch PVC. However, you should be able to toggle and choose different sizes if you're working with a different pipe diameter, male vs female threaded parts, e.

First you'll need a nearby water supply or main line. For this particular project, we chose an existing tap uphill of the new orchard space – which is also ideal for gravity flow to help the system maintain pressure. To connect to the main water line, we first turned off water to the property and turned on the tap to drain the lines. Next, we cut i.
