

# **Slovenia power generation container sales**

## Overview

---

The country is seeking to move away from fossil fuels through electrification of areas of the economy such as transportation and heating with generation resources which emit little or no greenhouse gasses such as nuclear power and renewables. Overview (TPES) in was 6.80 in 2019. In the same year, production was 16.1.

The transportation and industrial sectors were the largest consumers of energy in Slovenia in 2019. Slovenia is a net energy importer, importing all its products (mainly for the transport s.

deposits are found in the north central and northeastern regions of Slovenia; the country does not have any identified hard reserves. There is one active lignite mine in Slovenia, near in the nort.

is mainly provided by (36.2% in 2019), (29.1% in 2019), and (27.9% in 2019); the three sources accounting for 93.2% of total electricity generation.

Slovenia, both as an independent party and a member of the , signed the in 2016. The European Union Nationally Determined Contribution (NDC) towards climate goals includes Slovenia. I.

How much energy does Slovenia produce?

Slovenia generated 68.8% of its electricity with zero carbon or carbon neutral sources in 2019, dominated by nuclear power and hydroelectricity. Fossil fuels oil, coal, and natural gas contributed 61% of the total energy supply of Slovenia in 2019.

Does Slovenia use oil to generate electricity?

Following steep declines in use since 1990, Slovenia eliminated the use of oil for generating electricity in 2019. Renewable energy sources other than hydropower (e.g., biofuels, solar PV, waste, and wind) together provided 3.5% of total electricity generation in 2019.

Does Slovenia have a good electricity grid?

Slovenia has an effective electricity grid and is pursuing opportunities to partner with neighboring countries to build and strengthen natural gas interconnections, as well as opportunities to increase access to and markets in Serbia, Romania, Bulgaria, Greece, Turkey, and the Western Balkans.

Does Slovenia have solar power?

Per analysis published by the World Bank which considers natural features of a location such as altitude, humidity, cloud cover, and topography, Slovenia's solar PV potential is relatively low compared to global resources, but is comparable to that of other central and eastern European countries which lie north of the Alps.

How much money will Slovenia get from the EU Just Transition Fund?

Now with a clear phaseout timeline, Slovenia can begin drawing EUR 248.38 million from the EU Just Transition Fund. While the gas and oil markets have made progress toward privatization, electricity production remains largely in state hands.
