

# **Slovenia s first-generation photovoltaic panel manufacturer**

## Overview

---

Does Slovenia have a solar energy system?

Slovenian state-owned GEN-I saw an opportunity there and introduced a solar energy service for self-consumption for households unable to install photovoltaic panels. In cooperation with the Municipality of Ajdovščina in the western part of the country, the company set up solar power units on the roofs of five public buildings.

Will Gen-I become the first solar community in Slovenia?

The individual customers are expected to be connected to the network within weeks and become the first real solar community in Slovenia, the announcement reads. GEN-I and the Municipality of Ajdovščina first conducted a pilot project in Budanje. The first community rooftop PV plant was installed in 2020 on the primary school in the village.

How much money does Slovenia need to build a solar project?

The researchers noted the importance of realistic construction methods, including factors such as anchors, adhesives, membrane welding, and ballast use. Slovenia has set aside €16 million (\$16.7 million) to support solar energy communities, requiring projects to include at least 100 kW of PV capacity, with or without storage.

Did two Slovenian companies misrepresent a solar project to get EU funds?

The European Public Prosecutor's Office (EPPO) is investigating a €340,000 (\$349,350) fraudulent scheme allegedly involving two Slovenian companies accused of misrepresenting a solar project to obtain EU funds.

Does Slovenia have a reliable electricity grid?

Slovenia boasts a generally reliable electricity grid with a robust transmission network that ensures uninterrupted and high-quality power delivery. However, grid reliability can be impacted during winter periods due to increased energy

demand and reduced solar power output. 4 We can help you start your own solar module production company.

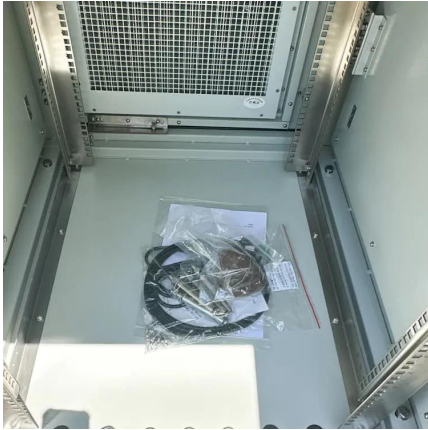

When will solar subsidy applications open in Slovenia?

Applications for the subsidy will open Mar. 18, 2025. Slovenia's solar market slowed in 2024, but the residential segment maintained the largest share as it adjusted to the phase-out of net metering and a new electricity tariff system.
