## Overview

---

Are sodium-ion batteries the future of energy storage?

With companies like NextThing Technologies, Faradion, AMTE Power, and Natron Energy leading advancements, sodium-ion technology is set to redefine energy storage. The industry is moving toward scalable, safe, and cost-efficient battery solutions, making sodium-ion batteries a cornerstone of future energy infrastructure.

Who makes sodium ion batteries?

Overview: A UK-based leader in sodium-ion technology, Faradion was the first company to commercialize sodium-ion batteries. Now backed by Reliance Industries, it is scaling up global production. High-energy-density sodium-ion batteries for EVs & grid storage. Stronger safety profile compared to lithium-ion.

Why is sodium a good choice for energy storage?

Sodium is widely available and sustainably extracted from seawater, making it a more environmentally friendly and ethical choice for energy storage. Due to its chemistry, our sodium battery can operate from  $-20^{\circ}\text{C}$  to  $55^{\circ}\text{C}$ , compared to lithium batteries, which typically function between  $0^{\circ}\text{C}$  and  $40^{\circ}\text{C}$ .

What is sodium ion battery?

Sodium-ion batteries of 48V60Ah and 48V100Ah developed by Nadion Energy is for LEV (Low-speed Electric Vehicle) like Golf cart. Stay up to date with the latest advancements in Sodium-Ion Battery technology by following our News and Blogs.

What is a sodium ion battery (SIB)?

We develop advanced Sodium-ion Battery (SIB) packs to power a cleaner, more efficient world. From mobility to stationary storage, our products support a wide range of applications, driving innovation in energy storage solutions.

## Why Sodium Ion Batteries?

Sodium Ion Batteries (SIBs) are up to 60% lighter in weight than lead-acid batteries.

Is sodium-ion technology a viable post-lithium solution?

As lithium-ion batteries face critical supply chain vulnerabilities and price volatility, sodium-ion technology (SIB) has emerged as the most viable post-lithium solution.
