

Solar power supply for the Dutch electricity system

Overview

Nearly 80% of solar power installed in the Netherlands in 2017 was for small systems of less than 10 kW, a large part being rooftop Solar PV. Larger systems over 500 kW accounted for just 6.9% of the total. By the end of 2018 private residential rooftop systems had an installed capacity of 2,307 MW.

Solar power in the Netherlands has an installed capacity of around 23,904 (MW) of as of the end of 2023. Around 4,304 MW of new capacity was.

2008 of 33 euro cents per were introduced but initially failed to attract much development. However, when they were curtailed, the Dutch banded together to.
