

Solomon Islands Solar Mobile Home Purchase

Overview

Are solar power systems a viable option for the Solomon Islands?

Solar power systems are now an affordable option for households looking to reduce their power bills and generate their own electricity. There is an increasing number of products and suppliers on the market, most of which will be able to be connected to the Solomon Islands grid.

How long do solar panels last in Solomon Islands?

The majority of solar energy systems installed in Solomon Islands last less than 2 years due to bad system design and poor user training. Superfly's systems are designed to last a minimum of 5 years (for basic systems) and 10 years for premium systems.

How many solar homes are there in the Solomon Islands?

"Solomon Islands currently has one of the lowest levels of access to electricity in the region, with over 85% of the population of Solomon Islands still without access to electricity and for this project alone, we received over 6,000 applications to obtain only 2,000 solar home systems," said Mr Aimaea.
