

# **South Africa energy storage power station procurement**

## Overview

---

Why did South Africa approve 616mw in new battery storage projects?

South Africa has approved 616MW in new battery storage projects as part of its energy storage scheme, a \$530 million investment boosting national grid capacity and championing local industry wins. From ESS News.

Will Red Sands be Africa's largest battery energy storage system?

Sungrow and Globeleq have signed a term sheet for the supply and long-term service of the Red Sands Battery Energy Storage System (BESS) project, set to become Africa's largest standalone battery energy storage system. The announcement was made in Munich, Germany, on 26 May 2025. The 153MW/612MWh Red Sands BESS.

How much storage capacity does South Africa have?

Following the signing of the agreements with these additional two projects South Africa has secured a total of 360 MW/1440 MWh storage capacity under the country's first grid-scale bid window.

How will Bess projects impact South Africa's Energy Security?

As South Africa continues to grapple with frequent blackouts and load shedding, these BESS projects will help mitigate risks and contribute to the country's energy security. The Gainfar Project will be connected to the Ngwedi substation, while the Boitekong Project will be connected to the Marang substation.

How much energy did the South African team receive?

The South African team was awarded the Merapi, Theseas, Harvard and Everest projects, which amount to 493 MW/1,972 MWh. To continue reading, please visit our ESS News website. This content is protected by copyright and may not be reused.
